EP880

EP880 Offline Encryption Device

The **EP880** application allows the offline encryption of files from a computer with Windows operative system.

With this application, files can be encrypted in order to provide them with a proper protection when they are stored in the computer hard disk, external devices connected to the computer or when they are sent by email.

The cryptographic functions of the application provide the authenticity, confidentiality and integrity of the files and messages managed by the application.

Reliable Security

- It is the only software on the market with high ENS level and LINCE certification.
- The EP880 is a software which allows to protect data and files for their exchange.

Simple Configuration

- Compatible with Windows 7, Windows 8.x and Windows 10 Operative Systems, of 32 and 64 bits, and Windows Server 2008 R2 of 64 bits.
- Full operating from user graphic interface.
