

# EP585

## Offline Encryption Devices Management System

The EP585 is a centralized secure management system for the model EP852 offline encryption devices.

The manager is composed of a physical device, as the figure below, and an application which must be installed in a Windows computer for its execution.

### Reliable Security

- It allows the creation of up to 2000 encryption keys, configuring their start date, expiration date and state (valid key, expired or revoked).

### Configuration

- Compatible with USB 2.0 HS (High Speed) ports.
- Operates in computers with Windows 7, Windows 8.x and Windows 10 operative system.
- Graphical and intuitive user interface.
- Multi-language user interface (Spanish/English).
- 128 GBytes standard storage capacity.
- It allows the management and configuration of the EP852 offline encryption devices.
- It allows the encryption and decryption of files encrypted with an EP852.
